Hitches that are Class I (commonly called "bumper hitches") aren't really appropriate for much more than a small sailing skiff, dinghy, or jon boat that weighs under 2,000 pounds. A Class II hitch is good for up to about 3,500 pounds, Class III goes up to 5,000 pounds, Class IV goes up to 12,000 pounds, and Class V can tow as much as 18,000 pounds.

Boat Towing Guide: How to Trailer a Boat - boats.com

Flat towing, also called dinghy towing, is the process of towing a vehicle behind another, with all four wheels of the towed vehicle touching the road. Not all vehicles can be flat towed, however. Modern vehicles sometimes have transmissions that require the car to be turned on and running to keep oil circulating properly through the transmission.

A CURT front hitch is a useful addition to a truck, jeep, van or SUV. With a 2" receiver and 9,000-pound straight-line pull rating, a front hitch can be used to attach a variety of accessories, including a snow plow, winch or even to hitch up a trailer when launching a boat or parking in a tight spot.

Find a Trailer Hitch for Your Vehicle

While towing, you're not going to be able to get on plane, which is probably a bad idea anyway. Just pull with a steady throttle, enough to keep ample tension on the lines. If you're towing in rough water, that will be more difficult. Rough water can be a challenge, but wind and current present their own challenges.

Towing a Boat on the Water - boats.com

This towing guide is straightforward and simply written so that both experienced RVers and novices get a clear understanding of the complexities of towing — whether you tow a fifth wheel trailer, trailer coach, or fold-down tent trailer behind your truck, car, or SUV.
