materials science. It
conveys the central
issue of materials
science, distinguishing
it from merely solid
state physics and solid
state chemistry,
namely to develop
models that provide
the relation between
the microstructure and

This course focuses on the fundamentals of structure, energetics, and bonding that underpin materials science. It is the introductory lecture class for sophomore students in Materials Science and Engineering, taken with 3.014 and 3.016 to create a unified introduction to the subject. Topics include:
