Regulation Of Trading Systems On

Pursuant to a legislative requirement, GAO reviewed the Securities and Exchange Commission's (SEC) new rule on the regulation of exchanges and alternative trading systems (ATS). GAO noted that: (1) the rule would allow ATS to choose whether to register as national securities exchanges, or to register as broker-dealers, depending on their activities and trading volume; (2) in addition, Regulation ATS will require alternative trading systems that trade a certain volume of securities to make ...

Regulation is used to try and protect consumers from the inherently risky nature of day trading. But with as little as 5% of brokers being regulated, getting that protection isn't always straightforward. However, as this page will show, forex, stocks, CFDs, and binary options trading regulations can benefit both traders and brokers.

SEC.gov | Alternative Trading System ("ATS") List

A trading system is a set of rules that can be based on technical indicators or fundamental analysis. A trading system tells the trader when and how to trade. In many cases, a trading system is like a blueprint for trading. A trading system is important for a trader because without it, there is no way a trader can expect to trade.
