Scand J Statist 12 On reliability theory and its applications 3 2.

System reliability Let us study the reliability of a technical system.

Assume that at any given instant the system is either functioning or faulty.

Denote the state of the system by  $X$  and set  $\{X = 1\}$  if the system is functioning;  $\{X = 0\}$ , if the system is faulty.

An approach to a theory of software reliability based on execution time is derived. This approach provides a model that is simple, intuitively appealing, and immediately useful. The theory permits the estimation, in advance of a project, of the amount of testing in terms of execution time required to achieve a specified
