Have you purchased a carburetor from Summit Racing? Need ...

Each style of carburetor has a fuel pressure range where they perform the best. The owners manual that came with your carb will give you set-up and tuning instructions. However, you can use the table below as a basic guideline.

What fuel pressure should I run with my new carb?

Speaking of regulators, the Summit manual that comes with this carburetor recommends that fuel pressure be 5 psi, but no more than 7 psi. Above that they recommend a regulator. This seems fairly consistent with the Holley float valves. My mechanical pump operates at just about 7 psi, so I'm going to probably try it without a regulator at first.
