For live sound reproduction during popular music concerts in mid- to large-size venues, there are typically two complete loudspeaker systems and PA systems (also called sound reinforcement systems): the main or front-of-house system and the monitor or foldback system. Each system consists of a mixing board, sound processing equipment, power amplifiers, and speakers.

Stage monitor system - Wikipedia

reinforcement of your words. By practicing responses out loud, you can hear your answers and assess their effectiveness. But don't practice so much that you lose your spontaneity and your answers sound rehearsed. The key to tricky situations is to remember that barriers to employment can often be overcome by focusing on the positive.

Description. DJ mixers are usually much smaller than other mixing consoles used in sound reinforcement systems and sound recording. Whereas a typical nightclub mixer will have 24 inputs and a professional recording studio's huge mixer may have 48, 72 or even 96 inputs, a typical DJ mixer may have only two to four inputs. The key feature that differentiates a DJ mixer from other types of larger ...
