E30 Manual Brake Conversion - morganduke.org

Manual brakes and BBK RX7 front brakes are a common cheap upgrade to the front of E30s. But they aren't a complete solution. Massive makes an adapter bracket to physically remove the booster. But those two mods alone won't give back the factory braking effort. I tried using a VW beetle (17mm) master cylinder.

Overview. The M5x can be fitted to any E30, no matter what engine it started out with. However, for the sake of costs it does help to use either a Touring, a Cabriolet or a car that started life as a 325i, as these cars will already be fitted with the Suspension and Brakes necessary for the job. The 325i can also reuse its entire drivetrain from the flywheel to the differential, which is a

I was wondering if anyone could link me a video or a write on a manual conversion on a RHD e30 as all the ones that i have found are for LHD. Im sure they aren't too different. From all the write ups and videos i've seen they use the brake fluid reservoir to bleed the clutch but for LHD there is a seperate clutch fluid reservoir which has a soft line to the master cylinder?

The clutch fluid reservoir can be bolted somewhere to the battery tray (if you have one left, a common E30 fault), and there should be 2 lines from this. The first goes down to the clutch master and the second which is a solid line routes across the bulkhead of the engine bay (there should be white plastic guide clips already in situ) to the offside of the car, down underneath to where the ...

Auto To Manual - E30 Zone Wiki

The E30 used in this conversion is a late U.S. model: 1990 325is. This information should apply to most U.S. E30s made after 1985 (as they share the same rear trailing arm assembly specifications). This information is based on an E30 with lowering springs installed.
