Changing How Patients and Doctors Talk About Death

MONDAY, Aug. 12, 2019 (HealthDay News) -- A kind, understanding doctor could spell the difference between life or death for diabetes patients, a new study suggests. British researchers found that patients had a lower risk of early death if their primary care doctor exhibited empathy. The study included 628 patients in the U.K. with type 2 diabetes.

Caring Doctors Can Be Life-Changing for Diabetic Patients

When the doctor asked for her thoughts, Alexandra replied, "I believe that the prognosis is better than what you conveyed." "In my view, chronic kidney disease is a more likely outcome," the doctor countered. "I feel obliged to share that with a new family." Alexandra gazed at us with wide, tear-filled eyes.

Why I'm a doctor: Life-changing stories from med students

iStock. Your doctor should never come across as judgmental during your interactions. If you're opening up to them about things that could affect your personal health, like being sexually active at a young age, they should listen with open ears—only offering medical advice. "If your doctor judges your life choices, without putting an effort to understand them, it's a clear sign, you should ...
