Sports drinks can widely be classified into three types based on the carbohydrate and electrolytes content, which are: 15.2.1. Isotonic sports drink: Isotonic sports drinks are referred to those drinks which contain similar amount of carbohydrates and electrolytes in comparison to human body. Generally, an isotonic sports drink comprises 8% carbohydrates.

### **Sports Drinks - an overview | ScienceDirect Topics**

If people consumed less food and energy it would help to prevent weight gain and reduce the global burden of non-communicable diseases such as cardiovascular disease, cancer, and type 2 diabetes [1] which cause a large proportion of deaths worldwide [2]. Changing cues in our immediate physical environments that influence consumption could contribute to addressing this problem [3, 4].
